NEONICA®

Light

crowns the work

We design

Artistry of production

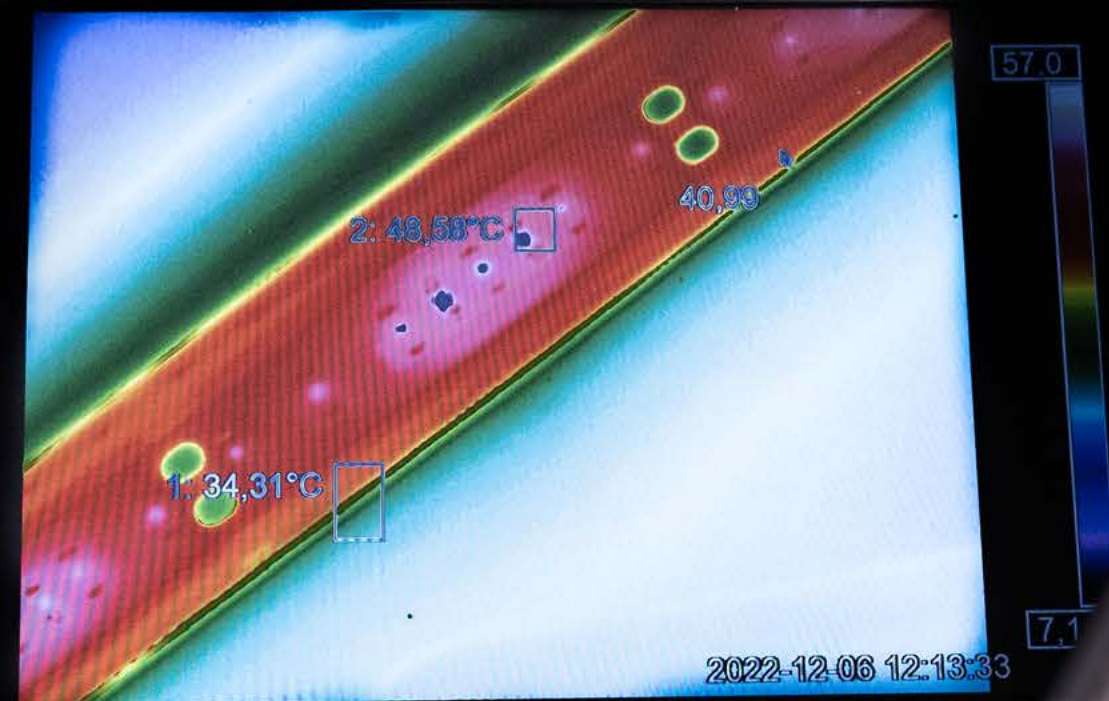

At NEONICA, innovation goes beyond simply adopting modern LED lighting solutions. Rather than copying existing designs, we strive for perfection by developing cutting-edge technology to produce unique and unparalleled LED strips and Linear Flexible Lighting Systems.

Pristine light quality

Neonica ensures pristine light quality by subjecting every inch of their LED strips to rigorous durability testing.

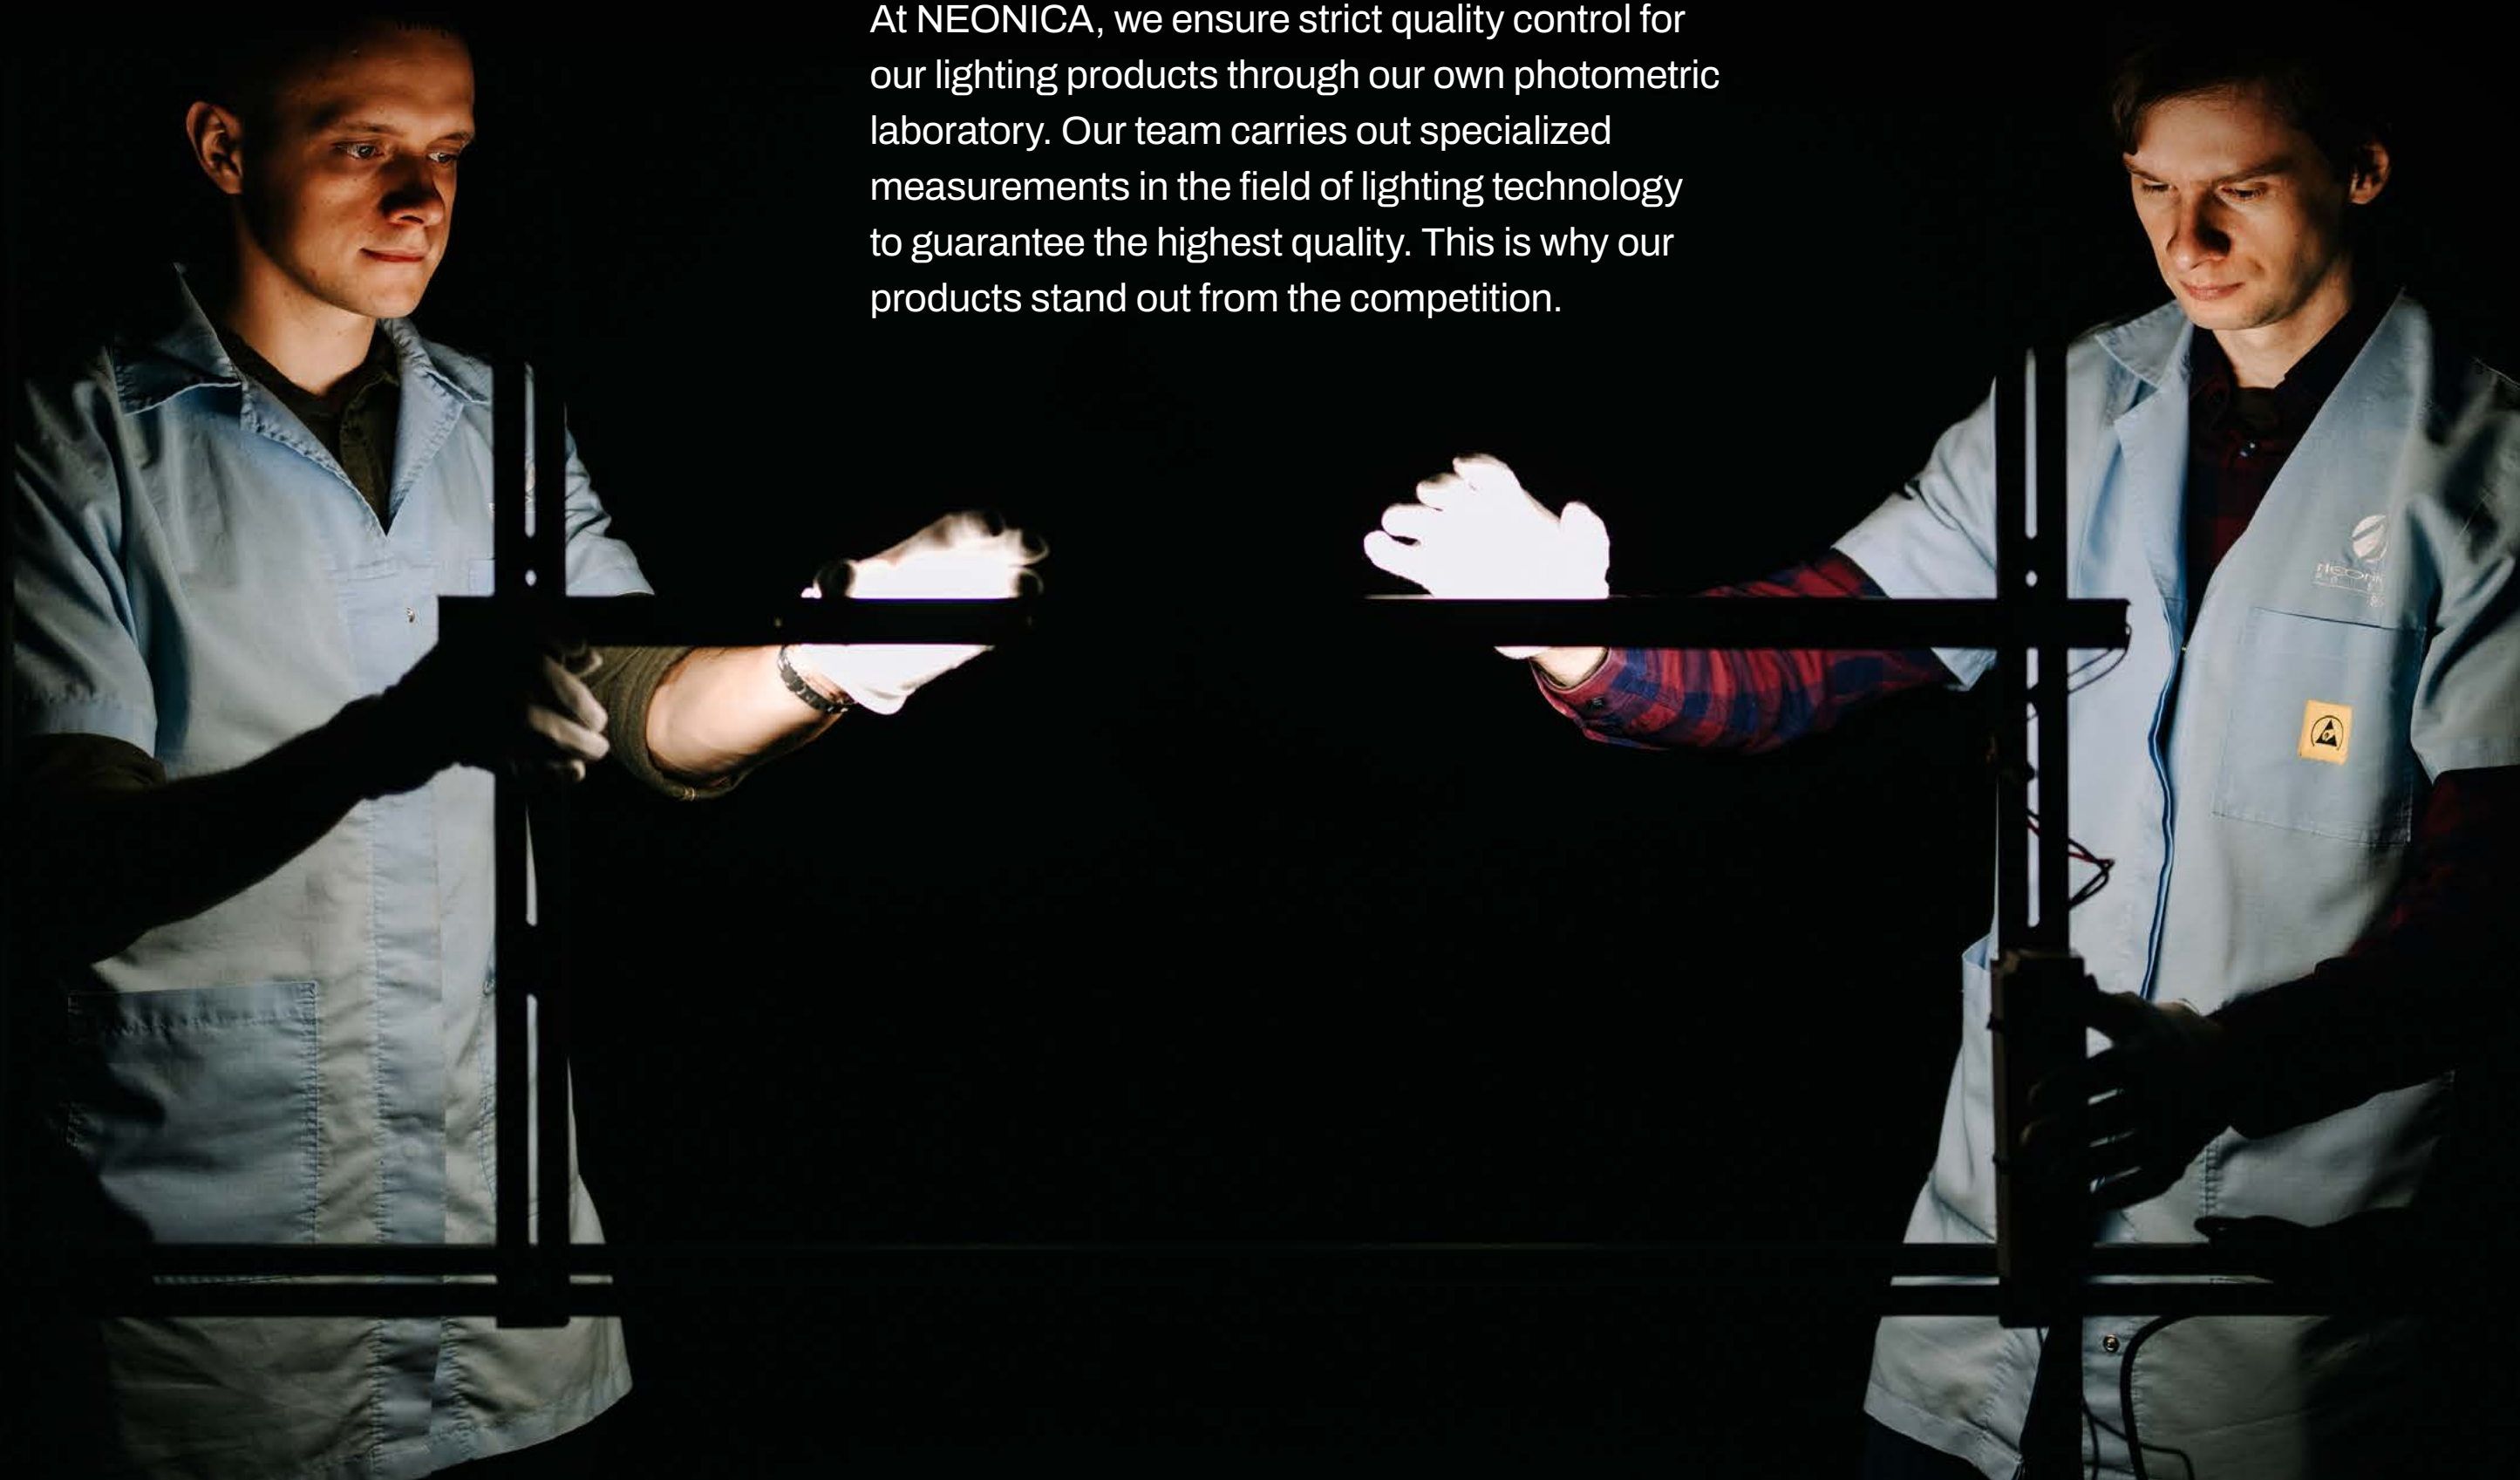

R&D Dept performs stringent quality controls to test the operating temperatures of all products and solutions in various environmental conditions. This allows for the elimination of possible construction errors during the design stage, resulting in perfect lighting that will provide satisfaction for many years to come.

See PC

Strict quality control

At NEONICA, we ensure strict quality control for our lighting products through our own photometric laboratory. Our team carries out specialized measurements in the field of lighting technology to guarantee the highest quality. This is why our products stand out from the competition.

We design

Excellence and Precision

When it comes to delivering high-quality products, we believe that excellence and precision are key. That's why we put so much effort into every step of the process, from the initial idea to the final packaging.

Our prototypes for new LED lighting go through extensive design and endurance testing to ensure that the end result is nothing short of exceptional. We know that our customers expect the best, and we're committed to delivering just that.

We produce

We produce

Five-stage quality control

In Europe, we stand out as one of the few manufacturers of LED tapes. Our factory in Lodz produces high-quality lighting solutions that offer a new dimension of light.

We use components sourced from reputable and established suppliers to create LED strips and Linear Lighting Systems that are extremely durable and suitable for all kinds of applications.

We produce

European quality

Our state-of-the-art production lines enable us to create a unique product for any individual order. The factory's independence guarantees timeliness and unique European quality.

We produce

A professional crew controls the process

Our linear lighting is meticulously crafted by a team of skilled professionals who oversee the entire production process.

The majority of our staff are seasoned experts with extensive experience in LED lighting. They continuously enhance their abilities and explore innovative approaches to ensure the reliability of our NEONICA products.

We produce

Automated production process

Industrial robots are utilized for repetitive manufacturing processes that require precision cutting or soldering. Some of these robots are designed specifically for our production needs.

We produce

Precision finishing supervised by female specialists

Our precision finishing process is overseen by a team of skilled female specialists. We hold human craftsmanship in high regard and that's why we rely on these exceptional women who have an unparalleled understanding of the finishing process. Even the most complex machines are no match for the delicacy and expertise of our female employees.

We export

We export

NEONICA products are highly valued worldwide for their quality. We currently ship our products to over 64 countries across all continents.

We bring out the *beauty* of every project

It's possible to turn any project into something great if you view it in a positive light. At NEONICA, we offer more than just impressive accomplishments.

Our LED lighting is perfect for showcasing the distinctive qualities of homes, villas, gardens, and even architectural features. We firmly believe that the satisfaction gained from long-lasting LED lighting far outweighs the brief happiness provided by a cheap price tag.

Beauty. Tranquility. Light.

When you embark on a project, you envision every little detail that contributes to the final outcome. There is absolutely no space for mistakes or shortcomings. That's precisely why NEONICA LED lighting is both beautiful and dependable.

For nearly three decades, we have been designing mesmerizing light installations that are known for their stunning beauty and, most importantly, their reliability. Our guiding principle when creating durable LED strips is ensuring safety. We go to great lengths to ensure that your lighting operates flawlessly, producing bright, uniform light without any discoloration. When you choose the NEONICA brand, you can rest assured that you're getting peace of mind.

We support artists

Light

brings out the beauty

Light is true art! That's why we love working with artists and supporting their visions, providing them with unique solutions and products that will truly crown their work.

Mural Festival / Montreal / Canadá / 2019

SPIDERTAG

Spidertag is an internationally recognized urban artist who creates innovative Interactive Neon Murals, which has completely transformed the the previously known world of murals and urban art. His art focuses on minimalism and abstraction, but in his works one can also see strong symbolism.

In his own words, it was only with the invention of flexible neons that his art took on a different dimension. For several years, in his art projects he has been using NEONICA products. His works can be found, among others, in the USA, Norway, France, Portugal or Sweden.

Karolina Hałatek

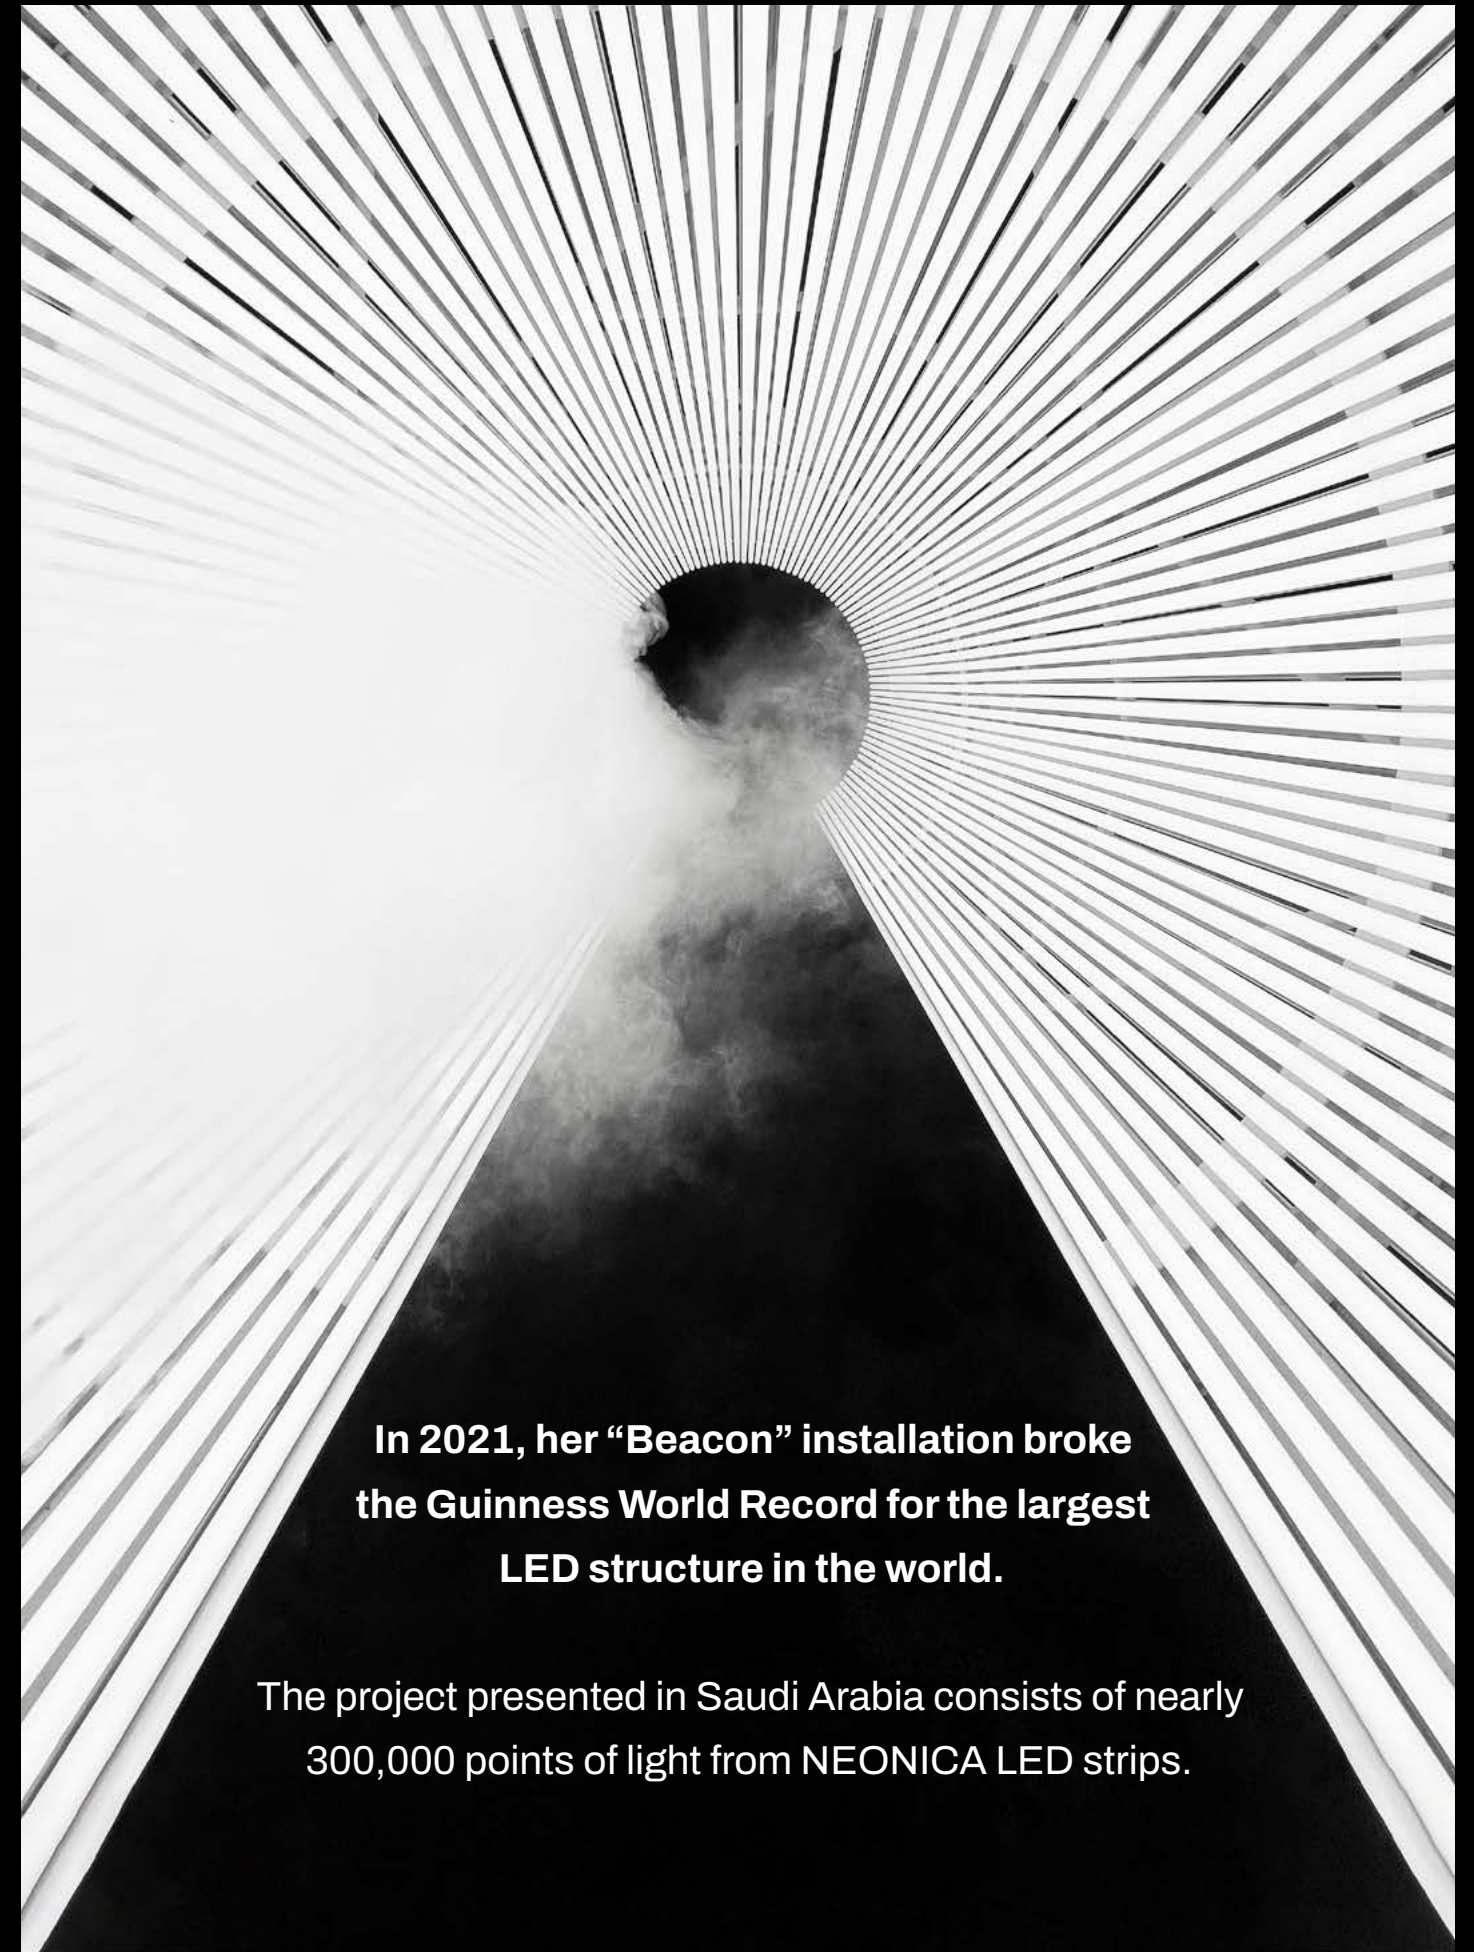

The author of the installation Karolina Halatek is a contemporary artist whose main subject of her work is light. Like no one else, she perceives mystical connection between the visual and metaphysical spheres, which the light gives. Her works are interdisciplinary projects verging on architecture, design and technology which presented “Ascent” is the illustration. She graduated from the University of the Arts London at the Faculty of Design for Performance and the Faculty of Media ArtAcademy of Fine Arts in Warsaw, from which she graduated with distinction. She also studied at the Faculty of Fine Arts at the Universität der Kunste in Berlin, where she participated in workshops at the Institut fur Raumexperimente under the direction of Olafur Eliasson. She is also a prizewinner of many awards and a scholarship from the Ministry of Culture.

We are happy that we were able to assist Karolina in the creation of this unique project of art and we contributed to the creation of the artwork.
